

# Modern Workplace with Secure Score V2.1

A Click-to-Run™ Solution from TD SYNnex

## Business Challenge

TD SYNnex Secure Score solution allows partners to apply Multi-Factor Authentication policies for all users except a Secure Score user that can be used as a break glass or emergency access account.

## Introducing TD SYNnex Modern Workplace with Secure Score V2.1

In our Version 2.1 we have added-in some great features, which include using an automation account that will be added to your tenant domain for managing the scheduled tasks. This will be configured as a service principle without credentials or logon capabilities.

We also use runbooks that will provide alert notifications when a runbook is executed. In the advanced option customers can upload their custom code, using a BYOC, which allows our partners to run their own runbooks.

Post deployment, partners can leverage the Score based on risk assessment to make recommendations to improve customers Office 365 security posture.

## Key Features

- **Security Baseline:** The Solution creates a security baseline with pre-configured security policies based on industry best practices.
- **Conditional Access Policies:** The Solution deploys conditional access policies (Azure AD P1, or P2 required)
- **BYOC:** Our Secure Score Click-to-Run™ allows you to bring your own code (BYOC) for creating your own runbooks.

## Business Outcomes

- Automated Security
- Identify Priorities
- Increase your security level
- Establish Security Baseline
- Flexible authentication strategy

## Why Leverage TD SYNnex Click-to-Run™ Solutions?

### Reduce Cost and Time

Reduce costs, time and risks by customizing and deploying pre-architected, validated and tested solutions.

### Offer More – Get More

Enhance your portfolio and increase your revenue by offering more options and solutions to your customers.

### Faster Time to Market

Receive a broad set of enablement resources to quickly build cloud solutions practices within your organization.
